

APCO Ultra Violet Light

The APCO UV Light improves indoor air quality by destroying odor causing VOC's (chemical odors) and neutralizing bacteria, mold, and viruses. It also keeps your air conditioning coils clean which helps improve system efficiency.

Air Duct Cleaning

Every home accumulates dust and dirt in their ducts through regular use, but there are several other factors that can increase the need for an air duct cleaning.

- * Pets
- * Occupants with allergies or asthma
- * Cigarette or cigar smoke
- * Water contamination or damage to the home / HVAC system
- * Home renovation or remodeling projects

You can see a water leak, but an air leak is invisible. Duct leaks can be difficult and costly to find with duct work hidden between the walls, floors and ceilings of your home. The older, traditional use of mastic (a messy caulk-like substance) or taping of leaks not only is less effective than Aroseal, but also can be very labor-intensive and expensive. Other substances break down over time, but the Aroseal sealant does not and even has a 10 year warranty to back it up.
